## LS-EXT-DECO-52\*20

### Description

With 17.3mm/0.68in inner width, this aluminum led profile can be surface-mounted in walls without protruding surface, suitable for our 10mm LED tape. Made of 6063-T5 high-quality aluminum alloy, this led drywall channel profile provides additional heatsinking and mechanical protection for the led light strip. 3 kinds of PC led light diffuser covers make the led lighting more uniform and soft, the difference between the PC clear diffuser, PC semi-clear difuser, and PC opal matte diffuser is the transmittance. 1m and 2m led aluminum profiles are available. Comes with end caps and mounting channel, the aluminum led diffuser channel is perfect for your homing lighting and commercial linear lighting.
